Before And After

The Boyce-Frost residence at 601 Third Ave. in Oakhurst has been featured on Planet Green's new show *Renovation Nation*. The Prairie-style home was renovated by **Renewal Construction Inc.** using green building principles, practices and materials.

Renewal's project was recommended for *Renovation Nation* by Southface, the Atlanta-based nonprofit that promotes sustainable homes, workplaces and communities through education, research, advocacy and technical assistance.

"We are excited about being chosen to serve as an example of what green building is all about," said Renewal CEO **Peter Michelson**. "We are committed to these principles and practices and pleased to be a part of the effort to increase public awareness of environmentally safe and affordable renovation options."

The episode will continue to air on Planet Green, so check local listings. The Boyce-Frost residence will also be featured in Decatur's Holiday Candlelight Tour of Homes in December. **IN**

For more information on Renewal Construction, call (404) 378-6962 or visit www.RenewalConstruction.com.
